Fingerprint

Keypad

Mechanical Key

Large LCD display + Clear Three-level English Menu;

## Know your Users User Management

The lock has a capacity of 150 fingerprints and 100 RFID cards. Every time a new user is enrolled, he must input his username.

The master user can easily track, manage and delete each lock users through the lock screen.

Lock Type: Mortise lock; Automatic Locking Mortise;

## Automatic Locking Bolts

Safe and Easy Way to Close the Door

Closing the door will automatically trigger the locking bolts. A spring in the mortise lock launches the locking bolts every time the sprung latch is activated.

Your door is always locked, you will never have to worry about it anymore.

Safe Handle Mechanism to prevent damage to the lock;

### Easy Handle

When opening the door, only half of the mechanical force drives the components, insuring a longer product life and making it easier for kids and elderly to operate.

### Operating System

Easy and Complete  
As easy to operate as a simple mobile phone device.

### Emergency Battery

If the batteries are discharged, it's possible to power the lock with a 9V battery.

## Stealth Identification Smart Password

The lock can be opened with a password too. In order to confuse people peeping at you when opening the door, the 6 digits password can be concealed within a random string of numbers. For example if the password is 123456, the following number will open the door: 46871234568761

## Batteries Powered Standalone Product

4 to 8 batteries power the lock for up to one year. Without an external power source, install your lock easily anywhere.

Anti-theft, Low-battery, Failed-attempt, Lock-failed alarms;

## Multi Alarms Always Be Careful

The lock alarm triggers if the batteries are low, if a user fails to authenticate multiple time or if a thief is picking the lock.
